## The 52-Week Savings Challenge

# 52 Week Savings Challenge

Every week, you save an amount of money that corresponds to the week of the year. In **week 1**, you save **R1 per day**, in **week 2** you save **R2 per day** etc. By the time you reach **week 52**, you'll be saving **R52 per day** for that week (R364 for that week), and you'll have accumulated **R9 646** by the end of the year.

I do realise this might potentially be challenging, but I like the idea that it starts small and then increases. So, one could also do R1 per day in week one all the way to R10 per day in week 10 and then continue doing R10 per day until week 52.

Or maybe instead of increasing every week, save R50 a week, which will result in R2,600 saved by the end of the year.

I feel this could be useful in building discipline, consistency, and a sense of power and accomplishment as the savings grow over time. Without feeling like a major sacrifice.
